IAM Identity Center ↗

▼ **Ready to streamline human access to AWS and cloud apps?**

Dismiss   Manage workforce users ↗

Identity Center is enabled. We recommend managing workforce users' access to AWS accounts and cloud applications in Identity Center.

User details

User name

    Mode-staff1

The user name can have up to 64 characters. Valid characters: A-Z, a-z, 0-9, and + = , . @ _ - (hyphen)

☑ **Provide user access to the AWS Management Console** - *optional*
If you're providing console access to a person, it's a **best practice** ↗ to manage their access in IAM Identity Center.

ⓘ **Are you providing console access to a person?**

User type

◉ **Specify a user in Identity Center - Recommended**
We recommend that you use Identity Center to provide console access to a person. With Identity Center, you can centrally manage user access to their AWS accounts and cloud applications.

○ **I want to create an IAM user**
We recommend that you create IAM users only if you need to enable programmatic access through access keys, service-specific credentials for AWS CodeCommit or Amazon Keyspaces, or a backup credential for emergency account access.

ⓘ If you are creating programmatic access through access keys or service-specific credentials for AWS CodeCommit or Amazon Keyspaces, you can generate them after you create this IAM user. Learn more ↗

☑ Provide user access to the AWS Management Console - *optional*

If you're providing console access to a person, it's a best practice ⧉ to manage their access in IAM Identity Center.

ⓘ **Are you providing console access to a person?**

User type

○ Specify a user in Identity Center - Recommended

We recommend that you use Identity Center to provide console access to a person. With Identity Center, you can centrally manage user access to their AWS accounts and cloud applications.
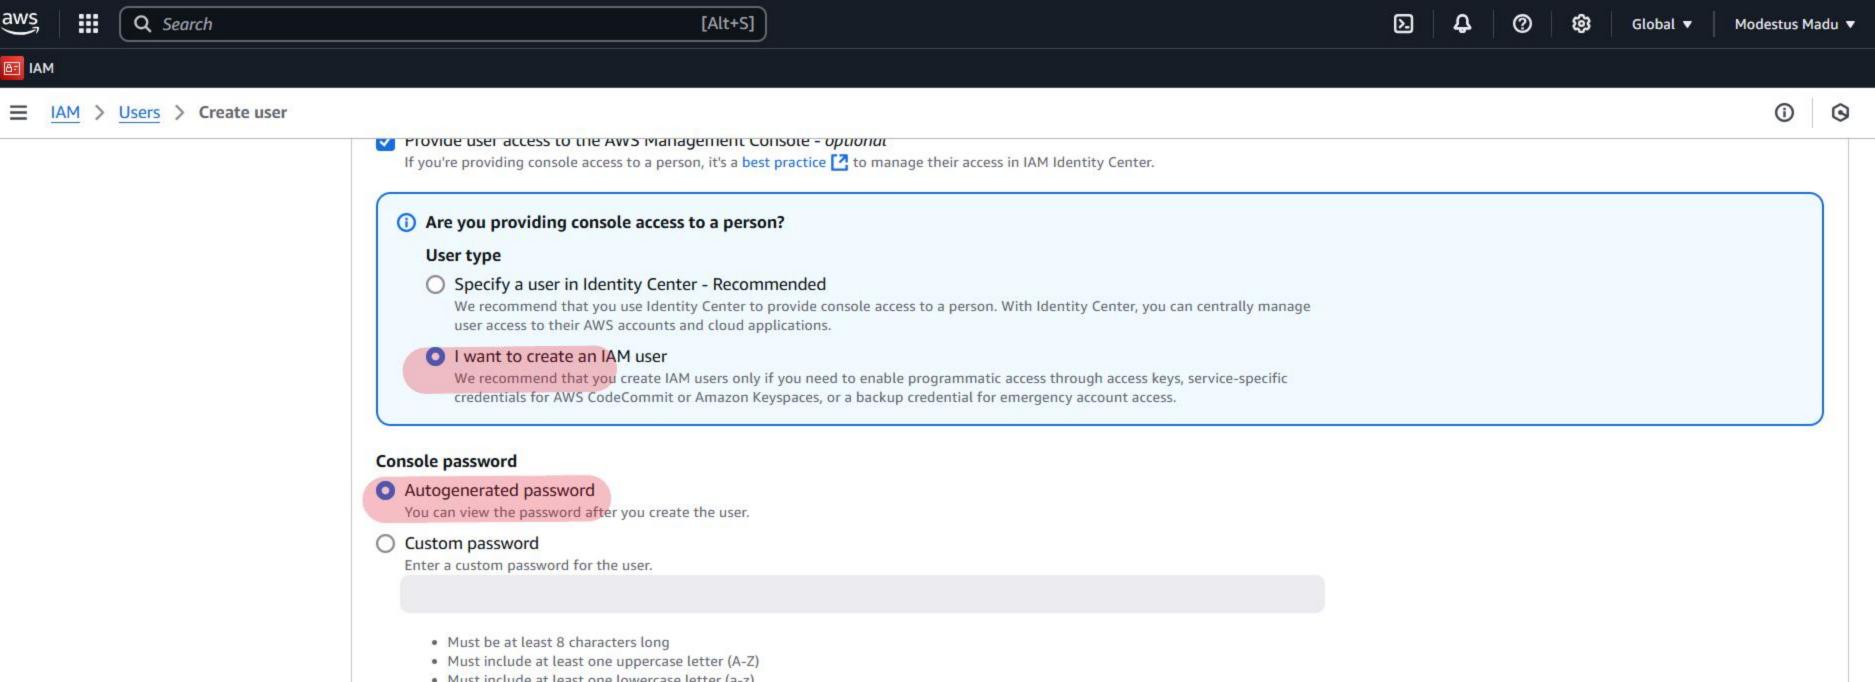

◉ I want to create an IAM user

We recommend that you create IAM users only if you need to enable programmatic access through access keys, service-specific credentials for AWS CodeCommit or Amazon Keyspaces, or a backup credential for emergency account access.

Console password

◉ Autogenerated password

You can view the password after you create the user.

○ Custom password

Enter a custom password for the user.

[   ]

- Must be at least 8 characters long
- Must include at least one uppercase letter (A-Z)
- Must include at least one lowercase letter (a-z)
- Must include at least one number (0-9)
- Must include at least one non-alphanumeric character (! @ # $ % ^ & * ( ) _ + - = [ ] { } | ')

☐ Show password

☑ Users must create a new password at next sign-in - Recommended

ⓘ If you are creating programmatic access through access keys or service-specific credentials for AWS CodeCommit or Amazon Keyspaces, you can generate them after you create this IAM user. Learn more ⧉

☰   **IAM** > **Users** > Create user   ⓘ   🕐

Step 1
● Specify user details

Step 2
◉ **Set permissions**

Step 3
◎ Review and create

Step 4
◎ Retrieve password

Set permissions

Add user to an existing group or create a new one. Using groups is a best-practice way to manage user's permissions by job functions. Learn more 🔗

Permissions options

| ◉ **Add user to group**
Add user to an existing group, or create a new group. We recommend using groups to manage user permissions by job function. | ○ **Copy permissions**
Copy all group memberships, attached managed policies, and inline policies from an existing user. | ○ **Attach policies directly**
Attach a managed policy directly to a user. As a best practice, we recommend attaching policies to a group instead. Then, add the user to the appropriate group. |
